Welcome to Shady Acres Perennial Nursery
~ 2010 Gardening Season ~

Shady Acres has been serving the green industry for over 50 years! Perennials are our specialty, and we are known for our huge selection of top-quality plants. Grown right here in our New Berlin, Wisconsin nursery, we offer over 1200 varieties of perennials, herbs, specialty annuals and hardy vines. We invite you to visit our garden center, where all the plants are arranged in an easy-to-find fashion.

Perennials are the perfect choice for enhancing your outdoor areas. A garden that changes and develops through the seasons will bring many years of beauty and enjoyment. If your space is limited, perennials are also well-suited for container gardens. You can use our on-site potting shed to "create-a-container" that is colorful, portable and easy to maintain.

Meander our display gardens to see mature perennials growing in a garden environment. Observe the foliage and blooms, gather ideas; then, use your creativity to design a garden that reflects your own style. Add the finishing touch with wind chimes, a birdbath or a piece of charming garden art from our unique collection.

Check out our popular calendar of events. Join us for a hands-on planting project or an informative seminar. Each event is designed to inspire and help you create a successful gardening experience! Don't miss Customer Appreciation Days in June. We have planned a special weekend to thank all of our loyal customers.

Our friendly staff welcomes your questions. Whether you are a beginning gardener or have years of "trowel and error", let us know how we can assist you. We are here to help with plant selection, garden ideas, container plantings, or any special requests. We wish you a year of happy gardening!

Thanks from all of us at Shady Acres!

P.S. Don't forget about our **GIFT CERTIFICATES** for your friends and relatives; ideal for house warmings, Mother's Day, Father's Day, birthdays and even Christmas.

Plant Guarantee

We guarantee our perennials to be healthy at the time of purchase and will thrive under the appropriate growing conditions. If a perennial fails during the first (current) growing season, we will offer a one-time replacement perennial. Replacements are not guaranteed. We do not guarantee the hardiness of any perennial over winter. Our guarantee is excluded from acts of nature, neglect, or other events beyond our control.

*Please contact us for advice if you have any concerns about the health of your perennials.

Returned Checks

A service charge of \$30.00 will be added to any returned checks.

Astilbe False Spirea

Spikes of graceful plumes, mostly erect but some arching types. Foliage varies from shiny light green to remarkably dark. Taller varieties can be used for cut flowers. Most Astilbes prefers a rich, moist soil in a semi-shade location. If grown in full sun, give them plenty of water, especially at bloom time.

All are listed under color headings to aid you in choosing varieties that fill your design needs. The astilbe bloom season extends from early to late summer. Therefore, the varieties marked with an "E" will bloom in approximately the first third of that period, those marked with an "M" in the second third, and those marked with an "L" in the last third. Sometimes there is an overlap between bloom times and that is indicated by "M – L" for mid to late season.

Helleborus Hellebore (Lenten Rose)

Winter and very early spring blooming plants. Great for the shady border or light woodlands. Helleborus is one of the most enchanting spring bloomers. The plant is not difficult to grow, but does require some attention. Helleborus mainly grow in the spring and fall. Due to the heat, these plants hardly grow in the summer. The evergreen varieties should be protected against the harsh winter winds.

Hosta

Low maintenance and bold foliage help make this the perfect shade and part shade perennial. Variegated types are better for shady areas, while green and yellow types can withstand more sun. Blue varieties usually have thicker substance and keep their color best in full shade.

Grasses

Native grasses provide the perfect complement to dry, prairie-like settings. Hybridized grasses work beautifully in landscaping and gardens. Foliage color ranges from green to variegated to blood red. From stunning vertical accents to low pin cushion-like varieties, these have become the newest landscape rage. Generally, most prefer sun. A light mulching in the fall is beneficial. Good drainage is essential for most varieties.

Herbs

The popularity of herbs continues, undoubtedly due to the onslaught of cooking and gardening television programs utilizing them in numerous ways. Herbs are used for culinary, medicinal, and ornamental purposes. The majority of the herbs we grow are for cooking, yet we offer some that are useful in decorating the home and garden. There are other "herbs" listed under our general perennial line.

(A)=Annual (B)=Biennial (P)=Perennial (TP)=Tender Perennial

Shady Acres Perennial Nursery
Top 10 List**

Just for fun, our Top Ten selections for this year include some perennials with edible sounding names. Do not try to eat these plants! Enjoy the attributes that make them nice additions to your garden areas.

Achillea 'Paprika' Add some spice to your garden with this aromatic yarrow. Paprika has excellent red flowers, and fern-like foliage that holds its scent when dried. Has tendency to spread in the garden; good choice for a meadow or naturalized area.

Astilbe 'Peach Blossom' Astilbes are long-lived perennials that grow best in light shade to filtered sun in soil that is consistently moist. This variety is just peachy, blooming in early summer with delicate light pink plumes.

Coreopsis 'Crème Brulee' Easy-to-grow makes coreopsis a great choice for beginning gardeners. This variety has tons of soft yellow flowers that attract butterflies. Long-lasting cut flowers are an added treat of this super perennial.

Dianthus 'Peppermint Star' This low-growing dianthus has a two-tone colored flower that really stands against its blue-green foliage. Make it a star at the edge of your perennial border, or try it in a colorful container garden.

Hemerocallis 'Blueberry Candy' Daylilies are popular perennials, adaptable to most growing conditions. This one blooms like crazy in midsummer, then reblooms later in the season. The fragrant flowers have ruffled petals in a gorgeous color combination of ivory and purple. Simply stunning.

Heuchera 'Caramel' Coral bells are grown mostly for their fantastic foliage. Caramel has bright yellow-orange leaves with purple-red undersides. It blends easily with other perennials in the landscape, or makes a sweet container garden plant.

Hosta 'Guacamole' Huge, glossy, apple green leaves are surrounded by streaked, dark green leaf margins on this wonderful hosta. Its flowers have a lovely fragrance. Hostas grow best in shade, but this one does exhibit some sun tolerance.

Iris siberica 'Butter and Sugar' Able to tolerate a wide range of soils, iris can enhance many garden settings. This award winner has doubly showy yellow and white flowers. The grass-like foliage looks elegant throughout the season.

Monarda 'Raspberry Wine' Buds that resemble raspberries open to reveal numerous refreshing wine-red flowers. Monarda is a rapid grower that attracts hummingbirds, butterflies and bees to the garden.

Phlox pan. 'Orange Perfection' Garden phlox are showy and fragrant. Let the brilliant salmon-orange color of this variety make a statement in your garden. Watch it attract butterflies, or cut a few stems for a vase indoors.

Shady Acres Perennial Planting Instructions

Due to the differing nature of soil conditions, moisture, and exposure in our area, the following planting instructions are suggestions for successful perennial establishment.

1. **Soil Preparation:** Prepare the soil by mixing 2-3" of compost with the existing soil in the area to be planted. At Shady Acres, mushroom compost and cotton burr compost are available for purchase.
2. **Planting:** Dig the hole twice the size of the pot but no deeper. Carefully remove the plant from the pot. Place the plant into the hole making sure it is at the same depth that it was in the pot. Backfill with the prepared soil. Lightly pack the soil around the root ball leveling off the soil around the plant.
3. **Water:** Following planting, water the plants thoroughly. Be sure the root area of each plant receives ample water. (A root stimulator may be applied. Follow directions on product label.) As the plants become established, water as needed. Weather will determine how often to water. Warm, windy day may require daily watering, while under other conditions water may not be necessary for two days or longer. Check to see if plants need water by sticking a finger into the surrounding soil. If the top 1-2" of soil is dry, watering is recommended.
4. **Mulch:** Apply 1-2" of mulch to the newly planted garden. Keep the mulch away from the crown of the plant to reduce the risk of rot. Cocoa bean shells, pine needles, or a light layer of compost can be used as mulch and are available at Shady Acres.

We hope that this information helps in your gardening experience.

Bulbs

We offer a unique selection of spring blooming bulbs in fall.

Important Basics for Success with Bulbs

Soil

Most bulbs adapt to many types of soil, but nearly all prefer a loose, well-drained soil structure. Before planting prepare the soil by working the top 1 to 1.5 feet so that roots can grow easily and water will drain through quickly. Heavy soils and extremely sandy soils can be improved by adding organic materials.

Planting time

Bulbs can be planted until the ground freezes. In northern zones, this usually means sometime between late November and mid December. Do not allow bulbs to freeze in storage. Bulbs must be planted in fall and not held until spring.

Fertilizing

Correct fertilization encourages bulb quality and their ability to perennialize. Loosen the soil and mix Bulb Booster fertilizer in with the soil at the time of planting. Do not apply fertilizer directly to the bulb.

Watering

Water thoroughly after planting. During active growth, bulbs need regular watering. Bulb roots grow deep, so watering should be thorough, not just a surface sprinkling.

Mulching

Mulching with organic material helps bulbs in several ways. It helps to minimize temperature fluctuations and to maintain an optimal moisture level in the bed. It also helps discourage weed growth.

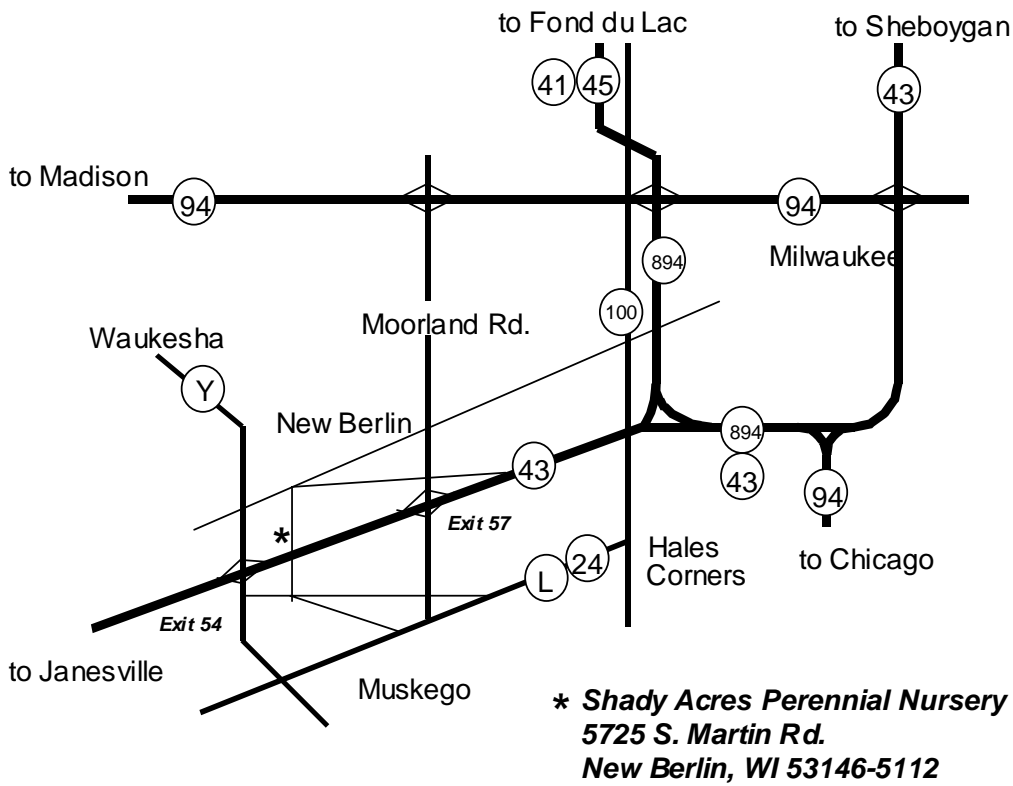

After care

After the flowers fade, remove the dead head or seedpod to keep it from forming seeds. This does not harm the bulbs, but channels energy into the bulb instead of seed production. The leaves must be allowed to remain green and alive long enough to store energy for next year's flowers. It's best to let the foliage remain until it has turned yellow.
