Welcome to Shady Acres Perennial Nursery
~ 2011 Gardening Season ~

Shady Acres has been serving the green industry for over 50 years! Perennials are our specialty, and we are known for our huge selection of top-quality plants. Grown right here in our New Berlin, Wisconsin nursery, we offer over 1200 varieties of perennials, herbs, specialty annuals and hardy vines. We invite you to browse our garden center, where all the plants are arranged in an easy-to-find fashion.

Perennials are the perfect choice for enhancing your outdoor areas. A garden that changes through the seasons will bring many years of beauty and enjoyment. If your space is limited, perennials and herbs also work well in container gardens. You can use our on-site potting shed to "create-a-container" that is colorful, portable and easy to maintain.

Meander our display gardens to see mature perennials growing in a garden environment. Come often to observe how the foliage and blooms change throughout the season. Then, use your creativity to design a garden that reflects your own personal style. Add the finishing touch with a colorful birdbath, soothing wind chimes or a piece of charming garden décor from our unique selection.

Check out our newly designed calendar of events. Join us for informative seminars, fun planting projects or special feature days throughout the season. Each event is designed to help make your gardening experience exciting and enjoyable!

Our friendly staff welcomes your questions. Whether you are a beginning gardener or have years of "trowel and error", let us know how we can assist you. We are here to help with plant selection, garden ideas, container plantings, or any special requests. We wish you an inspiring year in your gardens!

Thanks from all of us at Shady Acres!

P.S. Don't forget about our **GIFT CERTIFICATES** for your friends and relatives; ideal for house warmings, Mother's Day, Father's Day, birthdays and even Christmas.

Plant Guarantee

We guarantee our perennials to be healthy at the time of purchase and will thrive under the appropriate growing conditions. If a perennial fails during the first (current) growing season, we will offer a one-time replacement perennial. Replacements are not guaranteed. We do not guarantee the hardiness of any perennial over winter. Our guarantee is excluded from acts of nature, neglect, or other events beyond our control.

*Please contact us for advice if you have any concerns about the health of your perennials.

Returned Checks

A service charge of \$30.00 will be added to any returned checks.

Astilbe False Spirea

Spikes of graceful plumes, mostly erect but some arching types. Foliage varies from shiny light green to remarkably dark. Taller varieties can be used for cut flowers. Most Astilbes prefers a rich, moist soil in a semi-shade location. If grown in full sun, give them plenty of water, especially at bloom time.

The Astilbe bloom season extends from early to late summer. Therefore, the varieties marked with an "E" will bloom in approximately the first third of that period, those marked with an "M" in the second third, and those marked with an "L" in the last third. Sometimes there is an overlap between bloom times and that is indicated by "M – L" for mid to late season.

Coreopsis Tickseed

Excellent group of landscape plants that are low maintenance and have long bloom periods. Verticillata varieties have finely cut foliage. Grandiflora varieties have more substantial basal foliage. Coreopsis are not particular about soil. However, a sunny location is preferred. Cutting back after bloom promotes reblooming.

Helleborus Hellebore (Lenten Rose)

Winter and very early spring blooming plants. Great for the shady border or light woodlands. Helleborus is one of the most enchanting spring bloomers. The plant is not difficult to grow, but does require some attention. Helleborus mainly grow in the spring and fall. Due to the heat, these plants hardly grow in the summer. These plants should be protected against the harsh winter winds. Deer resistant.

Hosta

Low maintenance and bold foliage help make this the perfect shade and part shade perennial. Variegated types are better for shady areas, while green and yellow types can withstand more sun. Blue varieties usually have thicker substance and keep their color best in full shade.

Hosta

Low maintenance and bold foliage help make this the perfect shade and part shade perennial. Variegated types are better for shady areas, while green and yellow types can withstand more sun. Blue varieties usually have thicker substance and keep their color best in full shade.

The table shown on these two pages is a quick reference that categorizes the Hostas available at Shady Acres by leaf color and mature foliage clump size.

Grasses

Native grasses provide the perfect complement to dry, prairie-like settings. Hybridized grasses work beautifully in landscaping and gardens. Foliage color ranges from green to variegated to blood red. From stunning vertical accents to low pin cushion-like varieties, these grasses have become the newest landscape rage. Generally, most prefer sun. Good drainage is essential for most varieties.

Herbs

The popularity of herbs continues, undoubtedly due to the onslaught of cooking and gardening television programs utilizing them in numerous ways. Herbs are used for culinary, medicinal, and ornamental purposes. The majority of the herbs we grow are for cooking, yet we offer some that are useful in decorating the home and garden. There are other "herbs" listed under our general perennial line.

Shady Acres Perennial Nursery
Top 10 List**

Think pink! You'll be blushing with pride at the sight of these outstanding perennials. From colorful blossoms to fantastic foliage, each plant offers notable attributes making them worthy of a spot in your garden areas.

Achillea Tutti Frutti series *Yarrow* grows in full sun, and is drought tolerant once established. The varieties in the Tutti Frutti series have large flower heads in a range of colors that bloom all summer – great for fresh cut and dried arrangements.

Astilbe chinensis 'Visions in Pink' Looking for mid summer color in a garden area with moist soil and partial shade? Dense, upright pink plumes adorn this variety. Also looks dazzling in a container garden!

Chelone lyonii 'Hot Lips' Red stems, bronze-green leaves and rosy pink flowers that look like a turtle's head make this perennial a super choice for moist areas. *Chelone* is late to pop up in spring but puts on a spectacular show well into fall.

Cimicifuga 'Brunette' A striking specimen plant! Growing to four feet with leaves that are purplish-black and bottlebrush spikes of pale pink flowers, this *bugbane* is exceptionally beautiful in partial shade. Pair it with a gold leaf hosta!

Echinacea 'Pink Double Delight' So many *coneflowers* to choose from...this one is sure to delight you with an abundance of bright pink, pompon-like flowers throughout the summer. Plant in a sunny, dry area and leave the seed heads on as food for birds and winter interest in the garden.

Euphorbia 'Ascot Rainbow' This perennial is prized for outstanding variegated foliage that lasts from spring to fall! In cooler months, watch the leaves take on a rainbow of colors in shades of red, pink and orange.

Geum triflorum As a native wildflower known as *Prairie Smoke*, this perennial may naturalize by seeding in the garden. After flowering in spring, showy pink seed heads are formed which have a fine and feathery look to them. One of our favorites!

Grass: Calamagrostis brachytricha This clump-forming grass is happy in sun to partial shade, and blooms in fall. Pinkish tinged plumes rise above the stiff green leaves to a height of 3 to 4 feet. Gives a graceful look to the garden!

Polemonium reptans 'Stairway to Heaven' Step up to colorful foliage in the shade garden with this variegated Jacob's Ladder. Green leaves with white margins that are tinged with pink. Pale lavender-blue flowers top it off. Very showy!

Sedum caudicola The combination of blue-gray leaves, bright pink flowers and low maintenance make this groundcover type *stonecrop* a superb choice for sunny dry areas. It is also very attractive planted in troughs and living wreaths.

Shady Acres Perennial Planting Instructions

Due to the differing nature of soil conditions, moisture, and exposure in our area, the following planting instructions are suggestions for successful perennial establishment.

1. **Soil Preparation:** Prepare the soil by mixing 2-3" of compost with the existing soil in the area to be planted. At Shady Acres, mushroom compost and cotton burr compost are available for purchase.
2. **Planting:** Dig the hole twice the size of the pot but no deeper. Carefully remove the plant from the pot. Place the plant into the hole making sure it is at the same depth that it was in the pot. Backfill with the prepared soil. Lightly pack the soil around the root ball leveling off the soil around the plant.
3. **Water:** Following planting, water the plants thoroughly. Be sure the root area of each plant receives ample water. (A root stimulator may be applied. Follow directions on product label.) As the plants become established, water as needed. Weather will determine how often to water. Warm, windy day may require daily watering, while under other conditions water may not be necessary for two days or longer. Check to see if plants need water by sticking a finger into the surrounding soil. If the top 1-2" of soil is dry, watering is recommended.
4. **Mulch:** Apply 1-2" of mulch to the newly planted garden. Keep the mulch away from the crown of the plant to reduce the risk of rot. Cocoa bean shells, pine needles, or a light layer of compost can be used as mulch and are available at Shady Acres.

We hope that this information helps in your gardening experience.

Garden Shop

Make a stop in the Shady Acres garden shop! You will find gardening essentials like comfortable gloves, sturdy tools, plant supports, and zinc plant labels. Fertilizers, ready-to-use plant care products, and informative reference books are also available.

Bulbs

We offer a unique selection of spring blooming bulbs in fall.

Important Basics for Success with Bulbs

Soil

Most bulbs adapt to many types of soil, but nearly all prefer a loose, well-drained soil structure. Before planting prepare the soil by working the top 1 to 1.5 feet so that roots can grow easily and water will drain through quickly. Heavy soils and extremely sandy soils can be improved by adding organic materials.

Planting time

Bulbs can be planted until the ground freezes. In northern zones, this usually means sometime between late November and mid December. Do not allow bulbs to freeze in storage. Bulbs must be planted in fall and not held until spring.

Fertilizing

Correct fertilization encourages bulb quality and their ability to perennialize. Loosen the soil and mix Bulb Booster fertilizer in with the soil at the time of planting. Do not apply fertilizer directly to the bulb.

Watering

Water thoroughly after planting. During active growth, bulbs need regular watering. Bulb roots grow deep, so watering should be thorough, not just a surface sprinkling.

Mulching

Mulching with organic material helps bulbs in several ways. It helps to minimize temperature fluctuations and to maintain an optimal moisture level in the bed. It also helps discourage weed growth.

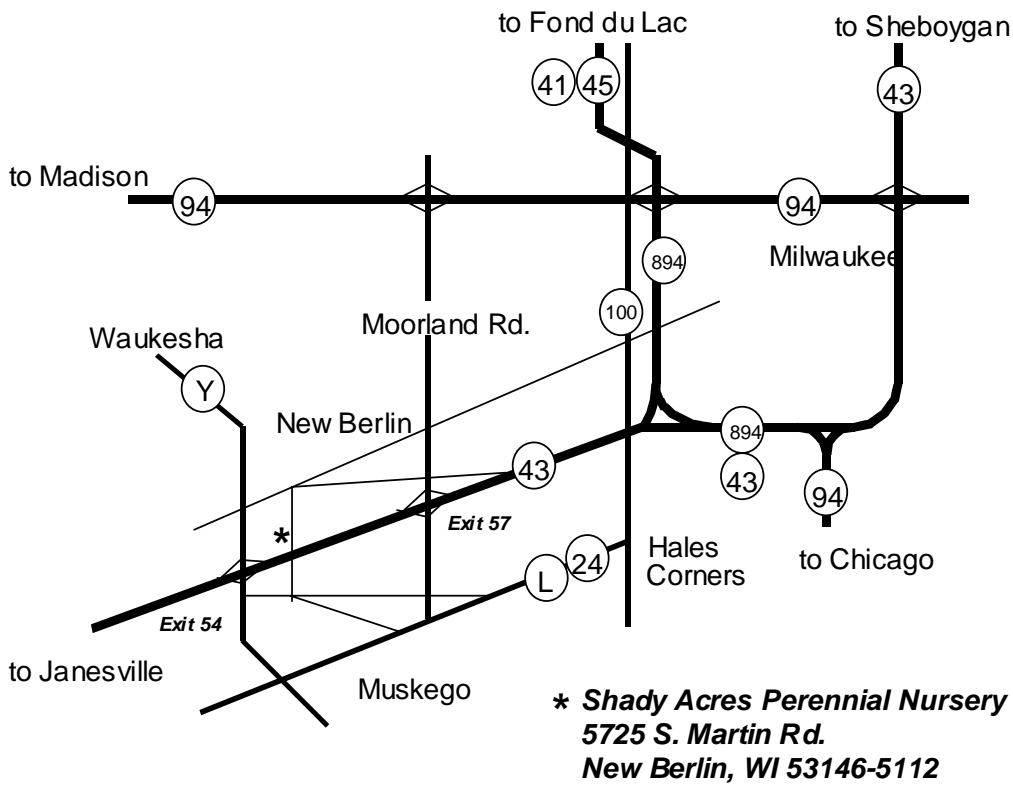

After care

After the flowers fade, remove the dead head or seedpod to keep it from forming seeds. This does not harm the bulbs, but channels energy into the bulb instead of seed production. The leaves must be allowed to remain green and alive long enough to store energy for next year's flowers. It's best to let the foliage remain until it has turned yellow.
