Welcome to Shady Acres Perennial Nursery
~ 2016 Gardening Season ~

Shady Acres is your destination for locally grown perennials. Since 1958, our family-owned business has been serving the green industry. Perennials are our specialty, and we are known for our outstanding selection of top-quality plants. We offer over 1200 varieties including perennials for sun or shade, ornamental grasses, native plants, groundcovers and fresh herbs! We invite you to browse our garden center, where all the plants we grow are arranged in an easy-to-find fashion.

Perennials are the perfect choice for enhancing your outdoor areas. A garden that changes through all four seasons will bring years of beauty and enjoyment. Stroll through our many display gardens to see mature perennials growing in a garden environment. Come often to observe how the foliage and flowers change throughout the season. Then, use your creativity to design a garden that reflects your own personal style.

Take a look at our revised calendar of events. We encourage you to join us for special feature days during the season, where we highlight a specific group of plants. These are fun and informative days to help inspire your gardening experience. You will also notice a change in our garden center hours in the late summer months.

Our friendly staff welcomes your comments and questions. Whether you are new to perennial gardening or have years of "trowel and error", let us know how we can assist you. We hope you enjoy each moment spent in your gardens.

Thank you from all of us at Shady Acres!

P.S. Don't forget about our **GIFT CERTIFICATES** for your friends and relatives; ideal for house warmings, Mother's Day, Father's Day, birthdays and even Christmas.

Plant Guarantee

We guarantee our perennials to be healthy at the time of purchase and will thrive under the appropriate growing conditions. If a perennial fails during the first (current) growing season, we will offer a one-time replacement perennial. Replacements are not guaranteed. We do not guarantee the hardiness of any perennial over winter. Our guarantee is excluded from acts of nature, neglect, or other events beyond our control.

*Please contact us for advice if you have any concerns about the health of your perennials.

Returned Checks

A service charge of \$35.00 will be added to any returned checks.

Astilbe False Spirea

Spikes of graceful plumes, mostly erect but some arching types. Foliage varies from shiny light green to remarkably dark. Taller varieties can be used for cut flowers. Most Astilbes prefers a rich, moist soil in a semi-shade location. If grown in full sun, give them plenty of water, especially at bloom time.

The Astilbe bloom season extends from early to late summer. Therefore, the varieties marked with an "E" will bloom in approximately the first third of that period, those marked with an "M" in the second third, and those marked with an "L" in the last third. Sometimes there is an overlap between bloom times and that is indicated by "M – L" for mid to late season.

Helleborus Hellebore (Lenten Rose)

Winter and very early spring blooming plants. Great for the shady border or light woodlands. Helleborus is one of the most enchanting spring bloomers. The plant is not difficult to grow, but does require some attention. Helleborus mainly grow in the spring and fall. Due to the heat, these plants hardly grow in the summer. These plants should be protected against the harsh winter winds. Deer resistant.

Hosta

Low maintenance and bold foliage help make this the perfect shade and part shade perennial. Variegated types are better for shady areas, while green and yellow types can withstand more sun. Blue varieties usually have thicker substance and keep their color best in full shade.

The American Hosta Growers Association established the AHGA Hosta of the Year in 1996.

Grasses

Native grasses provide the perfect complement to dry, prairie-like settings. Hybridized grasses work beautifully in landscaping and gardens. Foliage color ranges from green to variegated to blood red. From stunning vertical accents to low pin cushion-like varieties, these grasses have become the newest landscape rage. Generally, most prefer sun. Good drainage is essential for most varieties.

Herbs

The popularity of herbs continues, undoubtedly due to the onslaught of cooking and gardening television programs utilizing them in numerous ways. Herbs are used for culinary, medicinal, and ornamental purposes. The majority of the herbs we grow are for cooking, yet we offer some that are useful in decorating the home and garden. There are other "herbs" listed under our general perennial line.

(A)=Annual (B)=Biennial (P)=Perennial (TP)=Tender Perennial

Basil, Purple Ruffles <i>O. b. 'Purple Ruffles'</i>	Dark purple serrated and crinkled leaves. Excellent in vinegar and as a garnish. Nice ornamental herb, too.	A	3.5	2.95

Shady Acres Perennial Nursery
Top 10 List

Are you seeking mindfulness in each moment? How about well-being instead of stress? KEEP CALM and GARDEN ON. Each year, our garden center staff picks ten of our favorite perennials. We are pleased to suggest these plants to help bring harmony to your gardens from spring through fall.

Achillea 'Saucy Seduction' Yarrow is a dependable plant for sunny dry areas, spreading to fill in those tough-to-grow spots. This selection has long blooming fuchsia-pink blossoms that attract butterflies. The flowers are also useful as fresh cut or dried.

Brunnera 'Jack Frost' This perennial adds sparkle to a garden growing in light shade. Tons of little baby-blue flowers appear in spring. Then, the silvery heart-shaped leaves grow larger through the summer, putting on a spectacular display until frost.

Echinops ritro This tall perennial has spherical flowers that are eye catching and truly unique. Their metallic blue color complements other perennials blooming in late summer, like Echinacea and Heliopsis. Beneficial for the bees!

Euphorbia 'First Blush' We love the tri-colored foliage on this plant! A tidy mound of green, cream and pink looks soft and lush all season. The perky yellow flowers in spring are an added bonus.

Geranium 'Biokovo' A great low maintenance perennial. Forms a groundcover of citrus scented leaves that turn reddish in fall. Dainty white flowers touched with pink rebloom sporadically all summer.

Hemerocallis 'Barbara Mitchell' Every garden needs a few easy-to-grow daylilies. This elegant selection has large, soft pink blossoms with ruffled edges. Look for hummingbirds to hover about them!

Heuchera 'Midnight Rose' Coral bells provide fabulous foliage all season long. This one has deep purple-black leaves splashed with pink spots and flecks. Looks fantastic in a container garden too!!

Hosta 'Rhino Hide' The thickest leaves of any hosta! Cupped, puckered blue leaves have a lighter green center and show off the white flowers. Plant in combination with Aruncus, Carex and Tiarella in a partly shady area.

Nepeta 'Walkers Low' The name of this perennial is deceiving...it is not low growing. It is an all-time favorite of ours for its carefree nature, super long bloom time and aromatic foliage. Covered in lavender-blue flowers, bees and hummingbirds adore this plant!

Sisyrinchium 'Lucerne' This grass-like perennial is so cute! Its overall size is petite, making it great for edging. The purple-blue, star-like flowers bloom almost continuously and just make us smile ☺

Shady Acres Perennial Planting Instructions

Due to the differing nature of soil conditions, moisture, and exposure in our area, the following planting instructions are suggestions for successful perennial establishment.

1. **Soil Preparation:** Prepare the soil by mixing 2-3" of compost with the existing soil in the area to be planted. At Shady Acres, mushroom compost and cotton burr compost are available for purchase.
2. **Planting:** Dig the hole twice the size of the pot but no deeper. Carefully remove the plant from the pot. Place the plant into the hole making sure it is at the same depth that it was in the pot. Backfill with the prepared soil. Lightly pack the soil around the root ball leveling off the soil around the plant.
3. **Water:** Following planting, water the plants thoroughly. Be sure the root area of each plant receives ample water. (A root stimulator may be applied. Follow directions on product label.) As the plants become established, water as needed. Weather will determine how often to water. Warm, windy days may require daily watering, while under other conditions water may not be necessary for two days or longer. Check to see if plants need water by sticking a finger into the surrounding soil. If the top 1-2" of soil is dry, watering is recommended.
4. **Mulch:** Apply 1-2" of mulch to the newly planted garden. Keep the mulch away from the crown of the plant to reduce the risk of rot. Cocoa bean shells, pine needles, or a light layer of compost can be used as mulch and are available at Shady Acres.

We hope that this information helps in your gardening experience.

Garden Shop
