Welcome to Shady Acres Perennial Nursery

~ Less Screen Time, More Green Time in 2025 ~

Shady Acres is your destination for locally grown perennials. Since 1958, our family-owned business has been serving the green industry. Perennials are our specialty, and we are known for our outstanding selection of top-quality plants. We grow over 1000 varieties including perennials for sun or shade, ornamental grasses, native plants, groundcovers and herbs. We invite you to browse our garden center, where all the plants we offer are arranged in an easy-to-find fashion.

Perennials are the perfect choice for enhancing your outdoor areas. A garden that changes through all four seasons will bring years of beauty and enjoyment to you and to the wildlife that inhabits our earth. Stroll through our gardens around the shopping area to see mature perennials growing in a garden environment. Visit often to observe how the foliage and flowers change throughout the season. Then, use your creativity to design a garden that reflects your own personal style. This planting guide will assist in your planning and planting.

Notice our 2025 calendar of events. We encourage you to join us for special feature days during the season, where we highlight a specific group of plants. These are fun and informative days to help inspire your gardening experience.

Our friendly staff welcomes your comments and questions. Whether you are new to perennial gardening or have years of "trowel and error", let us know how we can assist you. We hope gardening with perennials will help bring a natural wellness into your daily life!

Thank you from all of us at Shady Acres!

P.S. Don't forget about our **GIFT CERTIFICATES** for your friends and relatives; ideal for house warmings, Mother's Day, Father's Day, birthdays and even Christmas.

Plant Guarantee

We guarantee our perennials to be healthy at the time of purchase. They will thrive under the appropriate growing conditions. If a perennial fails during the first (current) growing season, we will offer a one-time replacement perennial. Replacements are not guaranteed. We do not guarantee the hardiness of any perennial over winter. Our guarantee is excluded from acts of nature, neglect, or other events beyond our control.

*Please contact us for advice if you have any concerns about the health of your perennials.

Returned Checks

A service charge of \$40.00 will be added to any returned checks.

Astilbe False Spirea

Spikes of graceful plumes, mostly erect but some arching types. Foliage varies from shiny light green to remarkably dark. Taller varieties can be used for cut flowers. Most Astilbes prefers a rich, moist soil in a semi-shade location. If grown in full sun, give them plenty of water, especially at bloom time.

The Astilbe bloom season extends from early to late summer. Therefore, the varieties marked with an "E" will bloom in approximately the first third of that period, those marked with an "M" in the second third, and those marked with an "L" in the last third. Sometimes there is an overlap between bloom times and that is indicated by "M – L" for mid to late season.

	'Bressingham Beauty' Dusty salmon-rose flowers on gracefully arching plumes.	36"	18"	E – M	☉	#1	12.95

Grasses, Sedges, and Rush

Native grasses provide the perfect complement to dry, prairie-like settings. Hybridized grasses work beautifully in landscaping and gardens. Foliage color ranges from green to variegated to shades of red. From stunning vertical accents to low pin cushion-like varieties, these grasses have become the newest landscape rage. Generally, most prefer sun. Good drainage is essential for most varieties.

Herbs

The popularity of herbs continues, undoubtedly due to the onslaught of cooking and gardening television programs utilizing them in numerous ways. Herbs are used for culinary, medicinal, and ornamental purposes. The majority of the herbs we grow are for cooking, yet we offer some that are useful in decorating the home and garden. There are other "herbs" listed under our general perennial line.

(A)=Annual (B)=Biennial (P)=Perennial (TP)=Tender Perennial

Basil, Purple Ruffles <i>O. b. 'Purple Ruffles'</i>	Dark purple serrated and crinkled leaves. Excellent in vinegar and as a garnish. Nice ornamental herb, too.	A	3.5	3.95

2025
Shady Acres Perennial Nursery
Top 10 List

Less screen time, more green time! Find yourself captivated by your garden. Our 2025 list of favorite plants is based on staff picks that always catch our eye in the garden.

Brunnera m. 'Jack Frost' – Loaded with tiny blue flowers in late spring that seem to glow, followed by silvery leaves that grow in size through the remainder of the season.

Fern 'Lady in Red' – Enjoy watching the new fiddleheads pop up in spring! The lush green fronds will fill in your shade garden.

Heliopsis h. 'Sunstruck' – Unique variegated foliage is first to appear, adorned later by golden yellow, long-lasting blooms.

Hosta 'Wolverine' – The shiny, wavy leaves are striking from a distance! They are long and slender resembling claws.

Phlox 'Fashionably Early' Series – An earlier bloom period provides ample time to appreciate the showy, fragrant flower clusters.

Ratibida pinnata (Prairie Coneflower) – Lemon-yellow scented petals droop below a gray cone. This tall native plant makes an outstanding addition to your garden. Pollinators love it!

Sesleria autumnalis (Autumn Moor Grass) – Delightful iridescent seed heads shimmer in the fall sunlight above clumps of bright green grassy foliage.

Sisyrinchium a. 'Lucerne' (Blue-Eyed Grass) – Small but mighty...this compact perennial adds adorable purple-blue blooms and unique foliage to a rock garden or front of the border.

Solidago 'Fireworks' – Puts on an outstanding show! The vibrant fall blooms of this goldenrod may remind you of fireworks streaming through the air.

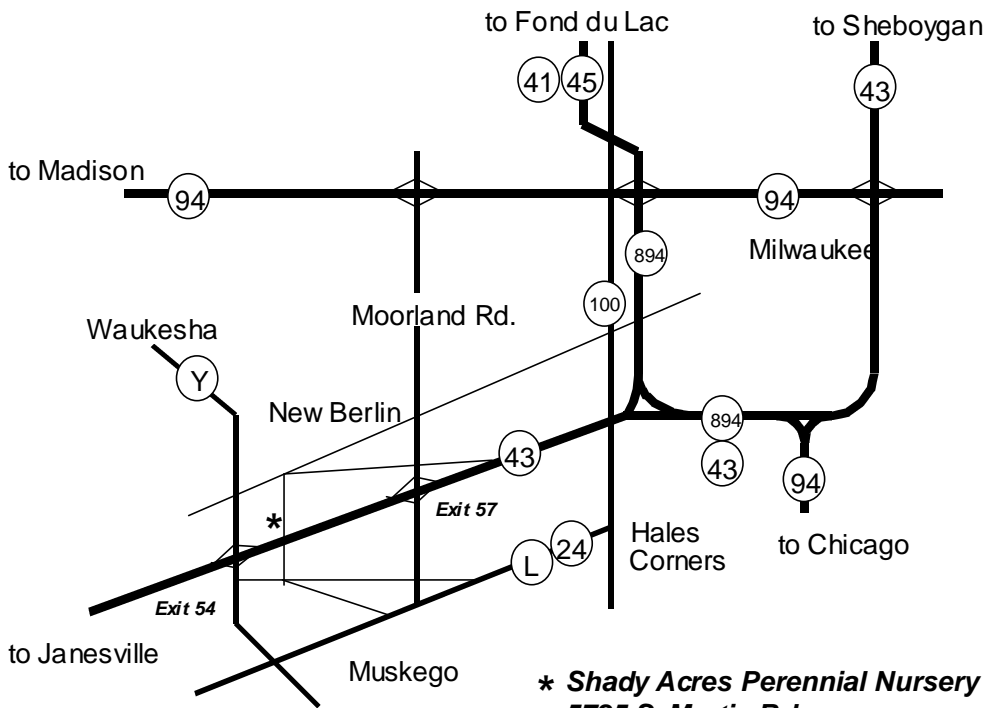

Zizia aptera (Heart-Leafed Golden Alexander) – This Wisconsin native is one of the first to pop through the soil in spring. Its small flowers provide an early nectar source for pollinators.

Shady Acres Perennial Planting Instructions

Due to the differing nature of soil conditions, moisture, and exposure in our area, the following planting instructions are suggestions for successful perennial establishment.

1. **Soil Preparation:** Prepare the soil by mixing 2-3" of compost with the existing soil in the area to be planted. At Shady Acres, mushroom compost and cotton burr compost are available for purchase.
2. **Planting:** Dig the hole twice the size of the pot but no deeper. Carefully remove the plant from the pot. Place the plant into the hole making sure it is at the same depth that it was in the pot. Backfill with the prepared soil. Firmly press the soil around the root ball leveling off the soil around the plant.
3. **Water:** Following planting, water the plants thoroughly. Be sure the root area of each plant receives ample water. (A root stimulator may be applied. Follow directions on product label.) As the plants become established, water as needed. Weather will determine how often to water. Warm, windy days may require daily watering, while under other conditions water may not be necessary for two days or longer. Check to see if plants need water by sticking a finger into the surrounding soil. If the top 1-2" of soil is dry, watering is recommended.
4. **Mulch:** Apply 1-2" of mulch to the newly planted garden. Keep the mulch away from the crown of the plant to reduce the risk of rot. Cocoa bean shells, pine needles, or a light layer of compost can be used as mulch and are available at Shady Acres.

We hope that this information helps in your gardening experience.
